## GENERAL

### Application

Honeywell EW773 Series ultrasonic meters are static compact heat or chilled water meters with electronic measurement based on the ultrasonic principle, consisting of an electronic energy calculator, an ultrasonic flow sensor and two temperature sensors.

They are used for metering of hydronic heating and/or cooling energy in hydronic systems based on volume, supply and return temperature.

EW7730 models are suitable for energy metering in heating systems ('heat metering').

EW7731 models are suitable for energy metering in heating, cooling or combined systems.

### Features

- Approval for ultrasonic meter with dynamic range of 250:1 (qp:qi) in class 2
- High battery efficiency, battery lifetime 11 years
- High long term stability, tested and verified by independent AGFW test
- Insensitive to dirt
- Optionally with integrated radio, Open Metering Standard, 868MHz
- Remote reading (AMR) with up to two add on plug & play modules

### Design

EW773 Series ultrasonic meters consist of:

- Electronic energy calculator with power supply and fixed or screwed cable connection to ultrasonic flow sensor
- Factory fitted supply and return temperature sensors
- Up to two communication modules (certain types only)
- Ultrasonic flow sensor with external threads according to ISO228 (DN15...DN40) or flanges PN25 (DN25...DN100)

### Materials

- Front panel of energy calculator made of light grey plastic with laser markings for approval, flow and other product information
- Back panel of energy calculator made of black plastic with grommets for flow sensor, temperature sensor and communication cables
- Housing of ultrasonic flow sensor made of brass with black plastic housing for transducer connections and holding fixture for energy calculator. EW7731 versions with potted electronics

### Approvals

- Heating: MID class 2 (DE-10-MI004-PTB013)

## TECHNICAL DETAILS

## Flow Data

Table 1. Flow rates EW773 Series

| DN                           | 15                | 20    | 25/32 | 40    | 50                         | 65                         | 80                          | 100   |
|------------------------------|-------------------|-------|-------|-------|----------------------------|----------------------------|-----------------------------|-------|
| Flow rates according to MID  |                   |       |       |       |                            |                            |                             |       |
| <b>Minimum (qi)</b>          | l/h               | 6     | 10    | 24    | 40 <sup>(1)</sup> /<br>100 | 60 <sup>(1)</sup> /<br>150 | 100 <sup>(1)</sup> /<br>250 | 160   |
| <b>Nominal (qp)</b>          | m <sup>3</sup> /h | 1.5   | 2.5   | 6     | 10                         | 15                         | 25                          | 40    |
| <b>Maximum (qs)</b>          | m <sup>3</sup> /h | 3     | 5     | 12    | 20                         | 30                         | 80                          | 120   |
| <b>Dynamic range (qp/qi)</b> |                   | 250:1 | 250:1 | 250:1 | 250:1                      | 250:1                      | 250:1                       | 250:1 |
| Additional flow data         |                   |       |       |       |                            |                            |                             |       |
| <b>Starting flow rate</b>    | l/h               | 2.5   | 4     | 7     | 20                         | 40                         | 50                          | 80    |
| <b>Overload flow rate</b>    | m <sup>3</sup> /h | 4.6   | 6.7   | 18.4  | 24                         | 36                         | 60                          | 132   |
| <b>Pressure loss @ qp</b>    | mbar              | 75    | 100   | 128   | 95                         | 80                         | 75                          | 75    |

(1) When installed in horizontal position

(2) When installed in vertical or tilted position

(3) When installed upside down

### Sizing

- EW773 Series Ultrasonic Hydronic Meters should be selected in such a way that typical system flow rates are between approved minimum (qi) and maximum flow rate (qs)
- Overload flow rate may be reached for not more than 15 minutes per day
- Flow rates below minimum and above maximum should be avoided

## Function

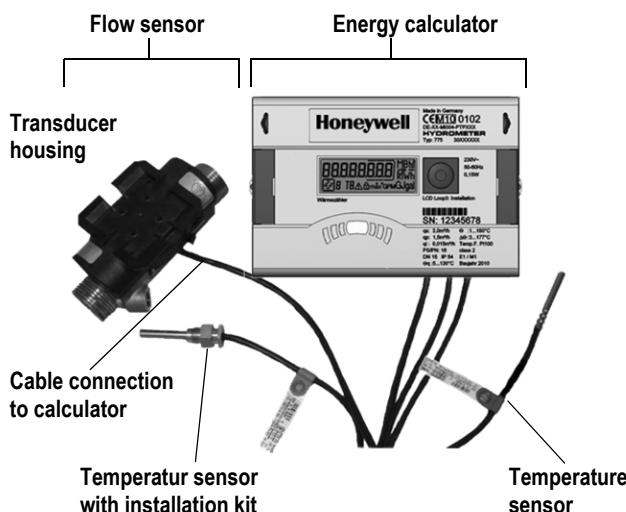

Fig. 1. EW773 components

### Energy Calculator

The energy calculator records flow rate and temperature and calculates logs and displays data.

The calculator can be mounted directly onto the flow sensor or to the wall. The meter can be read out from a single line eight-digit display with units and symbols. A push button provides control of various display loops. All failures and faults are recorded automatically and displayed on the LCD screen. For protection all relevant data is saved in a nonvolatile memory (EEPROM). This memory saves measured values, device parameters and types of error at regular intervals.

### Flow Sensor

The ultrasonic technology of the flow sensor permits very high measuring accuracy and can be used in the supply or return pipeline.

**Standard place of installation is return pipeline. For installation in supply a different version has to be used. Meters cannot be reconfigured from return to supply pipeline usage in the field.**

Standard cable length between calculator and flow sensor is

- 1.5m for meters up to qp6
- 3m for meters qp10-60

Other cable lengths are available on request.

### Power Supply

Standard

- A-cell lithium battery 3.6V DC with 11 year nominal lifetime

Optional

- D-cell lithium battery 3.6V DC with 16 year nominal lifetime
- 24V AC mains power supply with integrated, replaceable backup battery
- 230V AC mains power supply with integrated, replaceable backup battery

Nominal lifetime relates to normal usage. Battery lifetime is decreased by shorter readout intervals, longer data telegrams, etc.

### Temperature Sensors

EW773 Series ultrasonic meters are supplied with installed Pt500 temperature sensors with 2-wire leads, Ø5.2 x 2,000mm. The temperature sensors are installed to the meter with screw terminals and can be replaced by longer versions.

**Temperature sensors may only be changed in pairs.**

See chapter "Accessories" further below.

### Interfaces / Communication Slots

EW773 Series ultrasonic meters are equipped with a ZVEI optical interface for communication and testing as standard. EW773xF versions additionally have an 868MHz RF module on board. All meters further have two communication slots which can be occupied with plug and play modules. For more details on interface modules see chapter "Communication and Readout" below.

In configuration example below communication slot 1 is occupied and slot 2 is free.

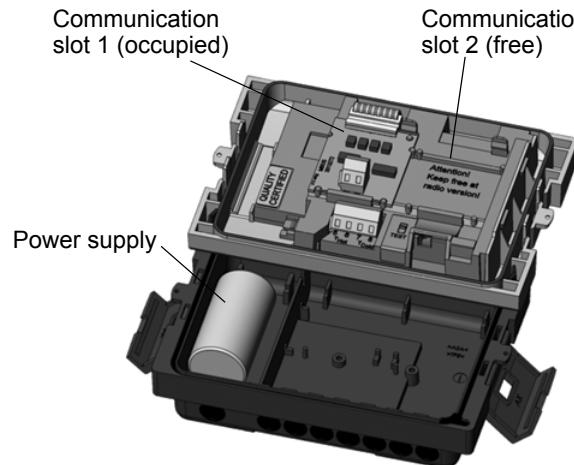

Fig. 2. Internal design

## Installation and Setup

### Flow Sensor

EW773 Series ultrasonic meters must be installed in the correct pipeline. When installed in the wrong pipeline measurements are either unreliable, inaccurate or non-existent.

**Pipeline configuration cannot be changed in the field.**

The correct pipeline can be determined by comparing the OS-Number or by looking up in service loop of the meter

- Meters with OS-Numbers ending between '00' and '49' are configured for installation in the return, for example 'EW7730A1200' or 'EW7731M7024'
- Meters with OS-Numbers ending between '50' and '99' are configured for installation in the supply, for example 'EW7730K1250' or 'EW7730K1273'
- Calming legs before or after meters are not required but a calming leg of 3 x DN before meters is recommended for flow stabilisation
- All sizes may be installed in any position
- Avoid installation at highest point of system or system part as air may be trapped in meter
- It is recommended to place a ballvalve before and after the heatmeter for easy replacement
- Connection fittings are available for sizes DN15...DN40
- For ball valves, connection fittings and a cross reference for which type to use see Accessories on page 14f

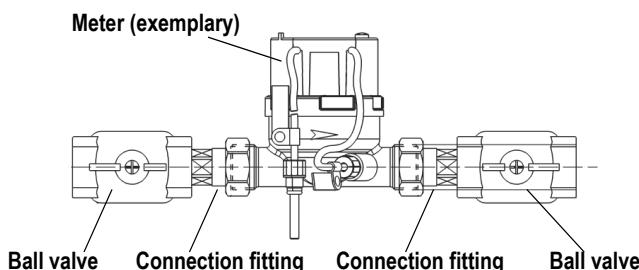

Fig. 3. Flow sensor installation

### Temperature Sensors

- Temperature sensors have to be installed like for like. Example: if one temperature sensor is installed directly in the flow, the second temperature sensor also has to be installed directly in the flow
- Temperature sensors may only be installed directly in the flow or, for larger sizes, with MID approved sensor pockets. See Accessories
- Sensor pockets can also be used for smaller sizes, although installation directly in the flow is preferred
- Various fittings and other accessories are available for sensor installation, see Accessories on page 14f

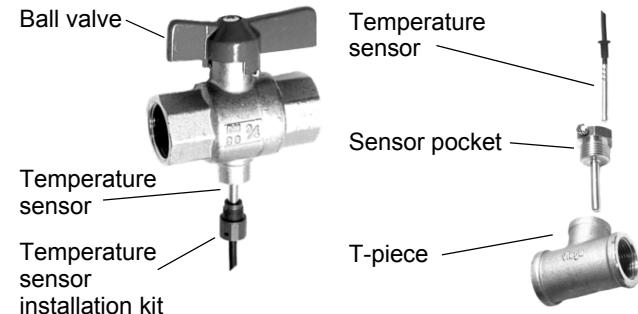

Fig. 4. Temperature sensor Installation with ball valve

Fig. 5. Temperature sensor Installation with sensor pocket

### Medium

Heat meters generally are only approved for metering of water and not for water glycol mixtures or other fluids other than water. During measurement meter must be completely filled with water.

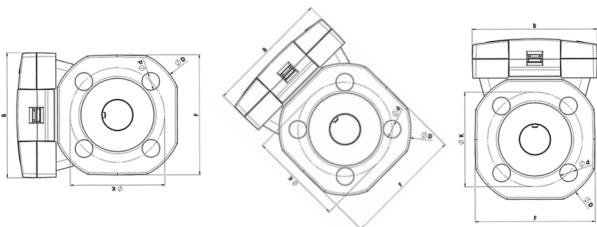

### Medium Temperature

Max. medium temperatures are as follows:

- 130°C when horizontally mounted and transducers (black plastic housing on flow sensor) turned sideways for DN15 and DN20, or
- 150°C when horizontally mounted and transducers turned sideways for sizes DN25...80
- 120°C when horizontally mounted and transducers turned upwards
- 120°C when vertically mounted

Max. medium temperature for all EW7731 is 105°C.

In any case calculator must be separated from flow sensor if medium temperature exceeds 90°C

**Fig. 6. Horizontal installation with counter showing sideways (preferred), 45° up (recommended minimum) and upwards (not recommended)**

### Software

In general it is not necessary to parametrise EW773 meters in the field unless standard values should be changed, for example pulse value for a meter with pulse output module. Such changes can be done with the IzarSet software. IzarSet is available in two versions:

- IzarSet Standard allows modification of primary and secondary address as well as some due dates and tariffs
- IzarSet Expert allows further settings, for example display contents and order of appearance and advanced meter configuration

### Calculator

Calculator can be installed on or separate from meter, for example with wall mounting plate which is supplied with meter as standard or with other mounting plates available as accessory

- Flow sensor and calculator of meters up to qp6 are connected by a permanently fixed cable with a length of 1.5m which may not be shortened, cut or manipulated in any way
- Cable between flow sensor and calculator of meters qp10 and larger has to be installed in the field
- Calculator must be separated from flow sensor if medium temperature exceeds 90°C

The IzarSet software is available free of charge from <http://metering.ecc.emea.honeywell.com/>. To activate Expert functions a USB dongle (EWP3021322) is required which is not free of charge and must be purchased separately.

## Communication and Readout

EW773 Series ultrasonic meters have an optical interface on the front panel and two internal communication slots which can be fitted with plug and play modules. Some EW773 models are factory fitted with modules so that one or both slots are occupied.

Empty slots can be retrofitted with modules. Possible module combinations are shown in Table 2 further below. Not all models are available in all sizes.

| Model                                    | Communication slot configuration                   | OS# starting       | Sizes available          |
|--|--|--------------------|--------------------------|
| A type:<br>freely configurable           | Slot 1: empty<br>Slot 2: empty                     | EW7730A<br>EW7731A | DN15...100<br>DN15...100 |

| M type:<br>for M-Bus networks            | Slot 1: M-Bus module<br>Slot 2: empty              | EW7730M<br>EW7731M | DN15...25<br>DN15...100  |

### Communication Options

#### Optical interface on front panel

Included as standard in all EW773 Series ultrasonic meters.  
ZVEI interface, M-Bus protocol, for readout and parametrisation. Required for access to meter:

- Bluetooth optohead (EWA3001799)
- PC with IzarSet software, or

#### Optional onboard RF module

Transmission interval 12...20 seconds (depending on telegram length), suitable for walk by, drive by and fixed RF networks.  
Open Metering Standard protocol, frequency 868MHz.  
RF module is on board and not retrofittable.

#### M-Bus interface module (EWA3022071)

Configurable telegram, according to EN13757-3, data reading and parametrisation via two wires with polarity reversal protection, auto baud detection (300 and 2400 baud), 2 M-Bus connections with 2 primary addresses.

#### Pulse output module (EWA3022073)

Module with 2 Open Collector pulse outputs (potential free), output 1: 4 Hz (pulse width 125ms), pulse or static conditions (e.g. errors), output 2: 100 Hz (pulse width ~5ms), ratio: pulse duration / pulse break ~ 1:1, configurable with IzarSet software.

#### Pulse input module (EWA3022074)

Module with 2 pulse inputs, max. 20Hz, configurable with IzarSet software, remote data transfer.

#### Combined pulse in-/output module (EWA3022075)

Module with 2 pulse inputs and 1 pulse output, configurable with IzarSet software, required for leak detection.

#### RS232 interface module (EWA3028129)

Serial interface for communication with external devices. Special data cable included. M-Bus protocol, 300 and 2400 baud.

#### RS485 interface module (EWA3022101)

Serial interface for communication with external devices, power supply with 12V ±5V, M-Bus protocol, 2400 baud.

#### Analogue output module (EWA3022106)

Module for 4 ... 20 mA with 2 programmable passive outputs, programmable value in case of error.

Field retrofittable only to EW773 meters with two free communication slots as this module occupies both communication slots and can therefore only be combined with RF (which is on board and does not occupy any slot).

Not all module combinations are possible. The following table gives an overview of possible combinations:

Table 2. Module combinations

| Slot 1       |    |           | Slot 2 |          |       |       |  |
|--------------|----|-----------|--------|----------|-------|-------|--|
|              | RF | No module | M-Bus  | Pulse in | RS232 | RS485 |  |
| No module    | •  | •         |        |          |       |       |  |
| M-Bus        | •  | •         | •      |          | •     | •     |  |
| Pulse out    | •  | •         | •      | •        | •     | •     |  |
| Pulse in     | •  | •         | •      |          | •     | •     |  |
| Pulse in/out | •  | •         | •      |          | •     | •     |  |
| RS232        | •  | •         |        |          |       |       |  |
| RS485        | •  | •         |        |          |       |       |  |
| Analogue     | •  | •         |        |          |       |       |  |

NOTE: All modules except RF can be retrofitted. RF module is on board and not retrofittable. Approval of meter is not affected when modules are retrofitted

## Typical Readout Applications

Following configuration examples are not all available in all sizes.

### Direct Readout

The meter is visited at its point of installation, consumption values are read off the display and recorded manually.

Recommended model: EW773xA

No communication module is required. If at a later time remote readout is required the EW773xA can be retrofitted with suitable modules.

### Alternatives

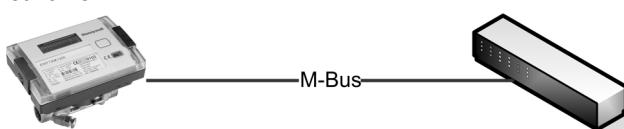

Any EW773 Series ultrasonic meter allows direct readout over the display.

### Wired M-Bus Network

The meter is attached to a wired M-Bus network which allows remote configuration and readout over the M-Bus master.

Recommended model: EW773xM

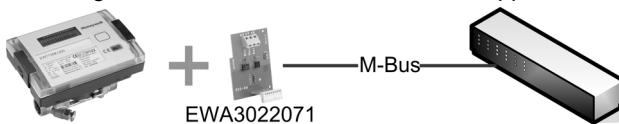

The factory fitted M-Bus module allows direct wiring to M-Bus networks.

Alternative 1: EW773xA + EWA3022071

In the field the EW773xA is equipped with M-Bus module EWA3022071 which provides the same functionality.

This configuration is available for all sizes and applications.

Alternative 2: EW773xK

EW773xK is equipped with both an M-Bus and a pulse input module which also allows direct wiring to M-Bus networks.

### Wireless Networks

Generally there are three kinds of wireless networks:

- Wired M-Bus networks which use RF links for selected parts of the network. Normally an RF capable meter transmits to RF/M-Bus converter EW535M0131 which in turn is wired to an M-Bus master unit
- Mobile RF networks, also called 'walk by' or 'drive by' networks. An RF capable meter is read out by a person periodically walking or driving past the meter and equipped with a suitable receiver
- Fixed RF networks. An RF capable meter is read out by a permanently installed receiver which automatically transmits the data on to an FTP server

All wireless networks mentioned above use the same kind of meter, i.e. all RF capable meters listed below are suitable for use in partially wireless M-Bus networks as well as mobile and fixed RF networks.

However, please note that Honeywell metering components with RF capability use the OMS protocol (Open Metering System) and 868MHz frequency. Although the OMS protocol ensures interoperability between components of different manufacturers Honeywell cannot be held liable for connectivity to equipment of other manufacturers.

Recommended model: EW773xF

The meter is equipped with an on board RF module which enables the meter to be attached to a suitable RF network.

There is no retrofittable internal RF module for EW773. For retrofit situations or for sizes not covered by EW773xF an alternative has to be used.

Alternative 1: EW773xM + EW9100AEZ001

The factory fitted M-Bus module in slot 1 allows direct wiring to external RF transmitter EW9100AEZ001..

Alternative 2: EW773xA + EWA3022071 + EW9100AEZ001

The meter is equipped with M-Bus module EWA3022071 and wired to external RF module EW9100AEZ001.

This configuration is available in all sizes for all applications.

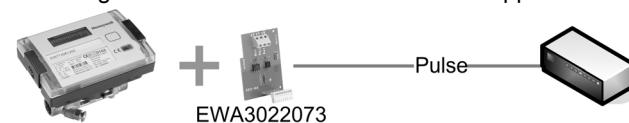

### Pulse Output Signal

The meter is attached to another device which is capable of counting pulses or a converter which converts the pulses into another signal

Recommended model: EW773xA + EWA3022073

The EW773xA is equipped with pulse output module EWA3022073 which enables it to transmit two pulses. Pulse unit and value are programmable with IzarSet software and BT optohead EWA3001799.

This configuration is available for all sizes and applications.

NOTE: EW773xL has a factory fitted pulse output module and is therefore also suitable for applications which require pulse output. However, please note that the L model is only available for installation in the supply.

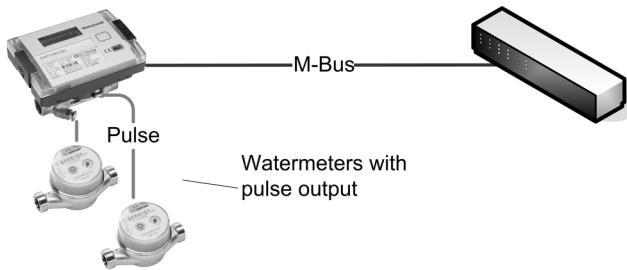

## Networks with LoopThrough Devices

The meter is attached to a wired or wireless network. Up to two other devices with pulse output can be read out via the EW773 and the values transmitted down the network together with the EW773's own metering data.

Each device is recognised as a separate device.

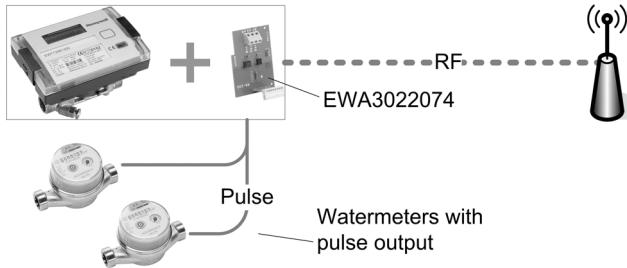

### Recommended M-Bus model: EW773xK

The factory fitted M-Bus module allows direct wiring to M-Bus networks. The factory fitted pulse input module allows wiring of up to two devices with pulse output into the EW773, for example a cold and a warm water meter.

### M-Bus alternative 1: EW773xM + EWA3022074

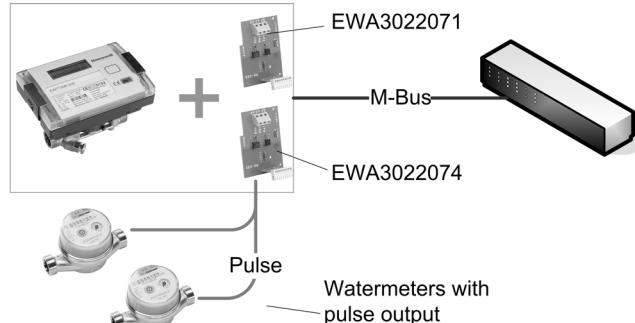

The factory fitted M-Bus module allows direct wiring to M-Bus networks. A pulse input module EWA3022074 is field installed.

### M-Bus alternative 2: EW773xA + EWA3022071 + EWA3022074

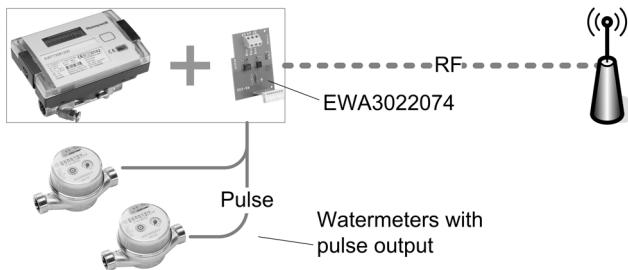

An M-Bus module EWA3022071 and a pulse input module EWA3022074 are field installed.

This configuration is available for all sizes and applications.

### Recommended RF model: EW773xF + EWA3022074

The factory fitted on board RF module enables the meter to be attached to an RF network using a suitable frequency and protocol. The meter is equipped with pulse input module EWA3022074 which allows wiring of up to two devices with pulse output into the EW773.

## Setup

### Onboard RF

No field setup required at meter. RF is activated automatically when meter is filled with water first time. RF can be de- and reactivated with IzarSet Expert.

### M-Bus Module

No field setup required at meter itself. M-Bus parametrisation, for example primary address setting, can be done via M-Bus master unit.

### Other Modules

Module setup is done with IzarSet Expert.

## Identification

All data given in this data sheet is only valid for the current generation.

### Current Generation ('EW773 Type 775')

- Grey Honeywell logo and OS-Number starting with 'EW773...' laser onto front panel
- 'Type 775' printed under approval mark in top right corner
- 8-digit LCD display
- Light grey front panel with black brackets on either side
- Black housing
- CE marking and MID approval in top right corner
- Serial number and meter specs in bottom right corner

Fig. 7. Top view of EW773 (Type 775)

### Previous Generation ('EW773 Type 773')

- Red Honeywell logo right hand of display
- OS-Number starting with 'EW773...' on label behind window on front panel
- 'Type 773' printed under specs in bottom left corner
- 7-digit LCD display
- Transparent plastic front panel with light grey sticker and black brackets on either side
- Black housing
- Red CE marking and push button outline
- MID approval, serial number and meter specs on label behind windows in bottom left corner/centre

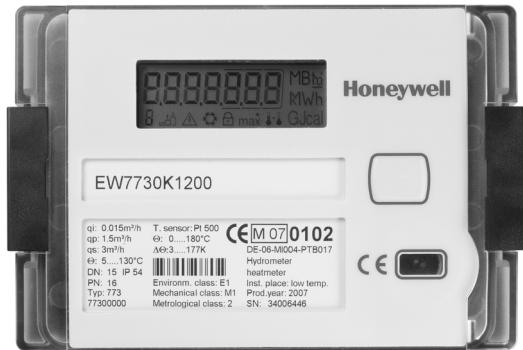

Fig. 8. Top view of EW773 (Type 773)

## Front Panel Contents

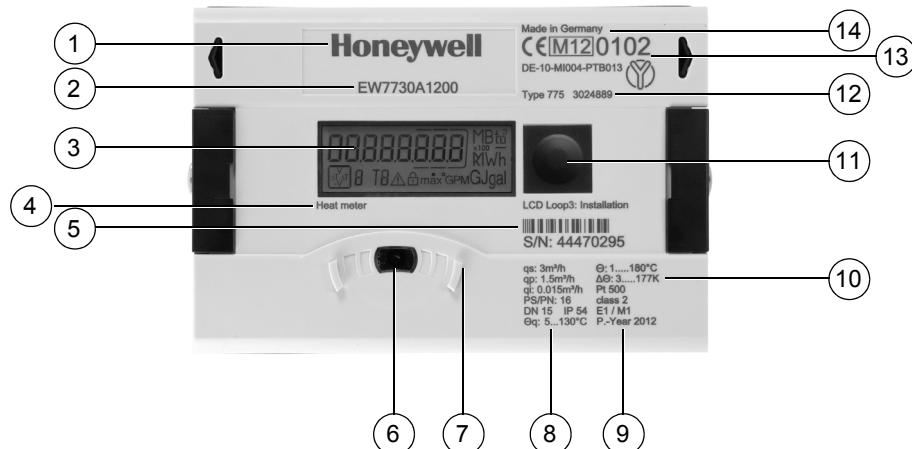

Fig. 9. EW773 front panel elements

| Number | Element                           | Details   |
|--------|-----------------------------------|---|
| 1      | Honeywell logomark                |   |
| 2      | OS-Number                         | Refers to Honeywell order specification   |
| 3      | Eight digit display               |   |
| 4      | Meter                             | <ul style="list-style-type: none"> <li>EW7730: "Heat meter"</li> <li>EW7731: "Heat meter with cooling tariff"</li> </ul>  |
| 5      | Installation and S/N              | <ul style="list-style-type: none"> <li>Installation place: "LCD loop 3" refers to the display loop where the installation place is listed</li> <li>S/N = eight digit serial number as barcode and clear text</li> </ul>       |
| 6      | Optical interface                 | Optical interface for meter readout or parametrisation. For use with Bluetooth optohead EWA3001799 and IzarSet software   |
| 7      | Flow data                         | <ul style="list-style-type: none"> <li>qs = maximum approved flow</li> <li>qp = nominal flow</li> <li>qi = minimum approved flow</li> </ul>   |

|  | 40      | 10 m³/h     | 300 mm |                             | EW7731M4824                                 |
|  | 50      | 15 m³/h     | 270 mm |                             | EW7731M5224                                 |
|  | 65      | 25 m³/h     | 300 mm |                             | EW7731M6024                                 |
|  | 80      | 40 m³/h     | 300 mm |                             | EW7731M7024                                 |
|  | 100     | 60 m³/h     | 360 mm |                             | EW7731M7824                                 |

## Scope of Delivery

- EW773 Series ultrasonic meter consisting of energy calculator and flow sensor
- Cable for connection of energy calculator to flow sensor for sizes DN40 and larger. (Sizes below DN40 have a fixed factory fitted cable)
- Supply and return temperature sensors installed to energy calculator, length=2m (except for ...25 versions)
- One or two installation kits EWA3001303 for pipe installation of temperature sensors:
  - DN15...20: one kit included (one sensor is already installed in meter housing)
  - DN25...50: two kits included
  - DN65 and larger: no kits included as immersion pockets are to be used
- Wall mounting plate EWA3007090
- Two paper sealings
- Operating and setup instructions

## Accessories

Unless stated otherwise accessories are sold in single packs. Table 7 below shows which connection set and ball valve can be used for which meter size. The meter size is given in the top line and refers to the eighth and ninth characters of the OS number. Example: Items listed in the column headed '12xx' can be used for all OS numbers with '12' as eighth and ninth character, e.g. 'EW7730A1200', EW7731M1200' or 'EW7730K1273' and so on.

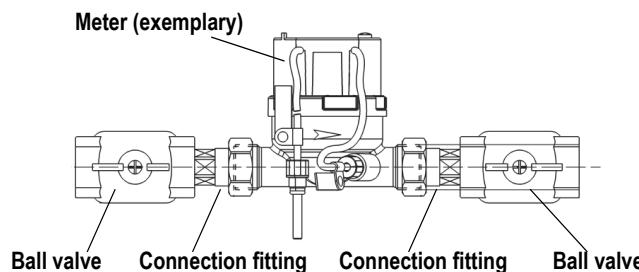

Fig. 12. Flow sensor installation

Table 7. Cross reference: connection sets and ballvalves/meter

| EW773xX...  | 12xx           | 14xx, 20xx     | 36xx           | 46xx           |
|---|----------------|----------------|----------------|----------------|
| DN size   | DN15           | DN20           | DN25           | DN40           |
| Connection size                                   | G 3/4"         | G 1"           | G 1 1/4"       | G 2"           |
| Connection fittings                               |                |                |                |                |
| Connection set with externally threaded tailpiece | 1 x EWA1500035 | 1 x EWA1500042 | 1 x EWA1500062 | 1 x EWA1500072 |
| Connection set with internally threaded tailpiece | 2 x VA7405A015 | 2 x VA7405A020 | 2 x VA7405A025 | n.a.           |
| Connection set with Sanpress crimp fitting        | 2 x VA7404A015 | 2 x VA7404A020 | 2 x VA7404A025 | n.a.           |
| Connection set with Mapress crimp fitting         | 2 x VA7403A015 | 2 x VA7403A020 | 2 x VA7403A025 | n.a.           |
| Ball valves                                       |                |                |                |                |
| Ball valve with additional port                   | EWA087HY003    | EWA087HY004    | EWA087HY005    | n.a.           |

### Connection Sets for Flow Sensor

#### Set of union nut, sealing and externally threaded brass tailpiece (one pack per meter required)

|                       |            |
|-----------------------|------------|
| For DN15, 1/2" x 3/4" | EWA1500035 |
| For DN20, 3/4" x 1"   | EWA1500042 |
| For DN25, 1" x 1 1/4" | EWA1500062 |
| For DN40, 1 1/2" x 2" | EWA1500072 |

#### Set of union nut, sealing and Mapress stainless steel crimp fitting (two packs per meter required)

|                           |            |
|---------------------------|------------|
| For DN15, for 15mm pipe-Ø | VA7403A015 |
| For DN15, for 18mm pipe-Ø | VA7403A018 |
| For DN20, for 22mm pipe-Ø | VA7403A020 |
| For DN25, for 28mm pipe-Ø | VA7403A025 |

#### Set of union nut, sealing and Sanpress red bronze crimp fitting (two packs per meter required)

|                           |            |
|---------------------------|------------|
| For DN15, for 15mm pipe-Ø | VA7404A015 |
| For DN15, for 18mm pipe-Ø | VA7404A018 |
| For DN20, for 22mm pipe-Ø | VA7404A020 |
| For DN25, for 28mm pipe-Ø | VA7404A025 |

#### Set of union nut, sealing and internally threaded red bronze tailpiece (two packs per meter required)

|                         |            |
|-------------------------|------------|
| For DN15, thread Rp1/2" | VA7405A015 |
| For DN20, thread Rp3/4" | VA7405A020 |
| For DN25, thread Rp1"   | VA7405A025 |

NOTE: Union nuts of connection sets EWA15000 are drilled for sealing with locking wire. Union nuts of connection sets VA7403, VA7404 and VA7405 are not sealable with locking wire

**Temperature Sensors**

**Replacement Pt500 temperature sensors in pairs (one pack per meter required)**

|                  |            |
|------------------|------------|
| Ø 5.2 x 2,000mm  | EWA3002680 |
| Ø 5.2 x 3,000mm  | EWA3002681 |
| Ø 5.2 x 5,000mm  | EWA3002682 |
| Ø 5.2 x 10,000mm | EWA3002679 |

**Connection Sets for Temperature Sensors**

**Temperature sensor installation kit (bulk pack of 20pcs)**

|                    |            |
|--------------------|------------|
| Brass, max. 130°C  | EWA3001303 |
| Plastic, max. 90°C | EWA3001305 |

**Tailpiece for direct connection of temperature sensor to T-piece with 1/2" internal thread. Temperature sensor installation kit required**

|   |             |
|---|-------------|
| R1/2" external thread,<br>M10x1 sensor thread | EWA087HY003 |
| G1/4" external thread,<br>M10x1 sensor thread | EWA354830   |

**Ballvalve with direct connection for temperature sensor.**

**Temperature sensor installation kit required**

|                              |             |
|------------------------------|-------------|
| DN15, G1/2" internal thread  | EWA087HY004 |
| DN20, G 3/4" internal thread | EWA087HY005 |
| DN25, G1" internal thread    | EWA087HY006 |

**Brass immersion pockets**

|                      |            |
|----------------------|------------|
| 35mm, for DN25...32  | EWA3002684 |
| 52mm, for DN40...65  | EWA3002685 |
| 85mm, for DN80...100 | EWA3004406 |

**NOTE:** Immersion pockets are mandatory for sizes DN65 and larger. They must be used for both temperature sensors, also when used with smaller sizes

**Modules****Internal modules**

|                                   |            |
|-----------------------------------|------------|
| M-Bus module                      |            |
| Single pack                       | EWA3022071 |
| Bulk pack of 72pcs                | EWA3023125 |
| Pulse output module               | EWA3022073 |
| Pulse input module                |            |
| Single pack                       | EWA3022074 |
| Bulk pack of 72pcs                | EWA3023130 |
| Combined pulse in-/output         | EWA3022075 |
| RS232 interface module with cable | EWA3028129 |
| RS485 interface module            | EWA3022101 |
| Analogue 4...20mA module          | EWA3022106 |

**External RF module**

|  |               |
|--|---------------|
| M-Bus, for all EW773 with M-Bus module | EWA9100AEZ001 |
|--|---------------|

**Other Accessories****Power supply**

|   |            |
|---|------------|
| Replacement A-cell battery                        | EWA3022102 |
| D-cell battery                                    | EWA3022103 |
| Mains supply unit 230V AC                         | EWA3022076 |
| Mains supply unit 24V AC                          | EWA3022079 |
| Replacement backup battery for mains supply units | EWA3022097 |

**Calculator mounts**

|                    |             |
|--------------------|-------------|
| Wall mount         |             |
| Single pack        | EWA3007090  |
| Bulk pack of 72pcs | EWA3007091  |
| Angle mount        | EWA3026160  |
| Distance mount     | EWA54200011 |
| DIN rail mount     | EWA54200012 |

**Meter parametrisation**

|                                   |            |
|-----------------------------------|------------|
| Bluetooth optohead, for all EW773 | EWA3001799 |
|-----------------------------------|------------|

|                                  |            |
|----------------------------------|------------|
| IzarExpert dongle, for all EW773 | EWP3021322 |
|----------------------------------|------------|

**Calibration certificates**

|                         |             |
|-------------------------|-------------|
| For up to five meters   | EWA3003095A |
| For six to 20 meters    | EWA3003095B |
| For more than 20 meters | EWA3003095C |
